See under "What are the business objectives that we expect to accomplish using the available funds?" above for more information.

- (4) Any net proceeds received from the exercise of the Agents' Option will be allocated to working capital and general corporate purposes and may be reallocated to conduct additional exploration and development activities on the Corporation's mineral properties.

The above noted allocation and anticipated timing represents the Corporation's current intentions with respect to its use of proceeds of the Offering based on current knowledge, planning and expectations of management of the Corporation. Although the Corporation intends to spend the proceeds from the Offering as set forth above, there maybe circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Corporation's ability to execute on its business plan. See under the heading "*Cautionary Statement Regarding Forward Looking Information*".

The Corporation's most recently filed audited annual financial statements and interim financial report each included a going concern note. Although the Corporation recently acquired the producing McCreedy West Mine, it has yet to generate positive cash flows from its operating activities, which may cast doubt on the Corporation's ability to continue as a going concern. The Offering is intended to permit the Corporation to restart operations at the Levack Mine and to continue to advance the Crean Hill Property and the Podolsky Mine to a construction decision and, while the Offering may help alleviate the risk that the Corporation is unable to continue as a going concern, it may not result in the removal of a going concern note in the next annual financial statements of the Corporation. See under the heading "*Cautionary Statement Regarding Forward Looking Information*".

How have we used the other funds we have raised in the past 12 months?

In the 12 months prior to the date of this Offering Document, the Corporation raised aggregate gross proceeds of approximately \$55,00,000 pursuant to the March 2025 Offering and the November 2024 Offering (see "*Summary Description of Business – Recent Developments*" above). The Corporation previously disclosed that net proceeds from the March 2025 Offering and November 2024 Offering would be used to advance its existing Sudbury projects and for general corporate and working capital purposes. The following table sets out the approximate amounts actually spent by the Corporation on advancing its existing Sudbury projects, working capital and general corporate purposes utilizing such funds:
